

# Rohit Bhatt

## FULL STACK DEVELOPER

[rohit.bhatt.dev@gmail.com](mailto:rohit.bhatt.dev@gmail.com) | [GitHub](#) | [LinkedIn](#) | [Medium](#) | [Portfolio](#)

## SUMMARY

Full Stack Engineer with 3+ years of experience building and scaling production applications using Ruby on Rails, React, JavaScript, and PostgreSQL. Strong background in backend systems, API development, performance optimization, and TDD. Experienced in AWS deployments, Sidekiq-based background processing, and cross-functional collaboration in fast-paced product teams.

## SKILLS

**Back-End:** Ruby on Rails, PostgreSQL, MySQL, Sidekiq, REST APIs, Node.js

**Front-End:** JavaScript, React, Redux, Next.js, HTML5, CSS3, Tailwind

**Cloud & DevOps:** AWS, Capistrano, Heroku, CI/CD

**Testing & Tools:** RSpec, TDD, Git, GitHub, Chrome DevTools

## EXPERIENCE

ekincare

**SDE II – Full Stack Engineer (Ruby on Rails, React)**

Hyderabad, India

December 2024 – Present

- Designed and implemented a Linear Programming-based solution to compute optimal SKU pricing combinations in real time, reducing package cost calculation time to milliseconds.
- Conducted a deep audit of the financial ledger system, identified critical data inconsistencies, and shipped fixes that led to cost savings worth multiple lakhs; recognized with the Tech Obsession Award.
- Designed and maintained RESTful APIs for the Reimbursement module, optimizing PostgreSQL queries and indexes and introducing Sidekiq-based background jobs and asynchronous processing to handle high-volume workloads efficiently, cutting dashboard load time by ~50%.
- Built and enhanced AI HealthBuddy, enabling automated health report analysis, daily nudges, and personalized user feedback to improve long-term engagement.
- Led system design and architecture of an AI-driven verification pipeline for internal tools, significantly reducing manual verification effort and turnaround time.
- Followed a test-first (TDD) approach, ensuring stable releases and catching regressions early.
- Delivered 40+ production features by collaborating closely with product managers, designers, and cross-functional engineering teams.

YOUR-SPACE

**Software Engineer – Ruby on Rails**

Delhi, India

October 2023 – December 2024

- Designed and implemented scalable relational database schemas and data models, improving query performance by 35% and supporting over 10,000 active users.
- Engineered a high-performance backend server using Ruby on Rails, handling over 25 thousands API requests per day across 3 platforms (mobile app, website, CRM), and maintained 99.9% uptime. Optimized for low-latency responses, reducing server load by 30% and improving response times by 25%, ensuring seamless user experience and high availability.
- Developed and integrated microservices, increasing data consistency and reducing communication errors by 25%, ensuring smooth operations across all platforms.
- Deployed the Ruby on Rails backend to AWS servers using Capistrano, reducing deployment time by 40% and optimizing AWS resources to scale with a 20% increase in user traffic.

- Built server-side rendered websites with Next.js, improving page load times by 30% and enhancing user engagement by 15% through seamless dynamic interfaces.
- Set up Metabase for reporting and analytics, automating 50+ SQL queries and providing actionable insights that drove key business decisions, improving overall operational efficiency by 20%.

PEEPOYE NETWORK

Remote

**Full Stack Engineer(Ruby on Rails, React)**

June 2023 – October 2023

- Created an opinion trading platform with a custom CMS featuring user authentication and live vote counts using Ruby on Rails and React.
- Migrated the official website from WordPress to Next.js, resulting in an 80% faster page load time.
- Reduced the bounce rate by 50% by enhancing the website's user experience.
- Increased the website's daily traffic to 10k users through SEO optimization.

MICROVERSE

Remote

**Code Reviewer (Ruby on Rails + React)**

November 2022 – June 2023

- Mentored junior web developers, providing technical support through code reviews.
- Proposed improvements to code organization to improve code quality and overall performance.
- Provided advice and tips on how to maintain motivation to maintain longevity in the program.

HUAWEI TECHNOLOGIES

Gurgaon, India

**Design Engineer**

February 2021 – October 2022

- Achieved 2 Star Bean Awards for consistent 96% customer satisfaction over two consecutive quarters.
- Led a 21-member team for a project and successfully completed it, receiving a client appreciation letter.

## EDUCATION

MICROVERSE

October 2022 – June 2023

**Remote Full Stack Web Development Program, Full Time**

- Dedicated over 1300+ hours to mastering algorithms, data structures, and full-stack development from the outset. Concurrently engaged in project development utilizing Ruby, Rails, JavaScript, React, and Redux.
- Acquired expertise in remote pair programming using GitHub, industry-standard git-flow, and daily standups for effective communication and collaboration with remote developers across international locations.

CHANDIGARH UNIVERSITY

**Bachelor in Computer Application**

July 2021 – July 2024

- Learned the fundamentals of computer science, including programming languages like C, Java, and Python.
- Studied computer science concepts such as data structures, algorithms, software engineering, and computer architecture, which enhanced understanding of the inner workings of computer systems.
